PIE FACE SKY HIGH

Recommended by Amber Razmus

This is sure to bring some laughs when played. My son loves the entire series of the pie face games and this is the latest one. It allows you to have some great family fun. www.amazon.com

LEGO

Recommended by April Kendall

What child didn't love LEGO's growing up? I know I did. Much hasn't changed in the world of children loving this toy today - except it's vast expansion for all ages of children. Building LEGO is a great tool for kids to broaden their thinking skills. These skills allow your child to build their imagination to endless degrees. Purchasing the blocks are extremely affordable and can be reused and shared with other children for more building block adventures. www.shop.lego.com
